Mehmet Berk Gürçay

Senior Cloud & Backend Engineer

Munich, Germany mbgurcay@gmail.com linkedin.com/in/mehmet-berk-gurcay github.com/mebegu mebegu.github.io

Summary

Backend engineer with 7+ years building serverless and event-driven systems on AWS, most recently on an IoT platform for more than 20 million connected tools and gateways. Earlier led the team behind a Client B CRM knowledge graph and built data pipelines and Power BI reporting for enterprise sales. Owns services through design, Terraform, and production debugging.

Skill Highlights

AWS Serverless & Event-Driven
IoT Platform · Battery Quality · CRM KG

IoT Platforms
IoT Platform (20M+ devices) · Device Platform

Infrastructure as Code
IoT Platform · Landing Zone · Battery Quality

Technical Leadership
CRM KG (8-person team, 3+ years)

Agentic Software Development
IoT Platform · Battery Quality · Landing Zone · SOC

Solution Design & Architecture
IoT Platform · Battery Quality · Device Platform

Data Engineering
Sales Analytics · CRM KG

Graph Data Modeling
CRM KG · Customer Feedback

Production Ops & Observability
IoT Platform · CRM KG · Sales Analytics

Core tech: Python · TypeScript / Node.js · Docker & Kubernetes · GitLab CI/CD

Experience

IoT Consultant

Concept Reply GmbH · Munich
2024-11 – now

- Designed and built OTA updates, device commands, and telemetry routing for Client A's AWS IoT platform (20M+ devices).
- Built the infrastructure, four-eyes approval, and audit trail for a Client A battery service as the sole Concept Reply engineer.
- Set up multi-account networking for the Client C AWS Landing Zone, developed an eBPF forensics pipeline for an open-source Kubernetes SOC, and built a GraphRAG chatbot at a Client B and Neo4j hackathon.

Tech Consultant

Motius GmbH · Munich
2019-05 – 2024-07

- Led an 8-person Scrum team for 3+ years on the Client B CRM knowledge graph: 19 analytical engines, Python ETL into Neo4j, and RAG with OpenAI.
- Built dbt models on Snowflake and Power BI reports for Client B sales leadership, and delivered projects for Client F, Client E, and a government office.

Co-Founder

Loopcake · Istanbul
2016-02 – 2017-12

- Built a Git-integrated learning platform; national entrepreneurship competition runner-up.

Project details with roles, team sizes, and full stacks follow on the next pages.

Skills

AWS: Lambda, IoT Core, Step Functions, API Gateway, ECS, Glue, DynamoDB, S3, RDS, SQS, SNS, KMS, CloudWatch, X-Ray, Bedrock, VPC, Transit Gateway, Route 53, Organizations, Control Tower, IAM Identity Center

Code: Python, TypeScript, JavaScript, SQL, Cypher, C#, Kotlin, NestJS, Express, Flask, Quarkus, TypeORM, LangChain, Streamlit, Powertools for AWS Lambda, Pydantic

Data & messaging: Snowflake, dbt, Neo4j, PostgreSQL, ClickHouse, MongoDB, Redis, Power BI, Kafka, MQTT, Sparkplug B, EMQX

Infrastructure: Terraform, AWS CDK, CloudFormation, Docker, Kubernetes, Helm, GitLab CI/CD, GitHub Actions, Azure DevOps

Quality & AI: pytest, Jest, Testcontainers, SonarQube, Kiro, Claude Code, GitHub Copilot, Codex

Education

Master of Science, Informatics Technical University of Munich (TUM) 2021

Bachelor of Science, Computer Engineering Koç University, Istanbul 2017

Internships: Client B R&D, Istanbul (Java plugin for JIRA) · İş Bank, Istanbul (network engineering)

Certifications

AWS Certified Solutions Architect – Associate 2026

Neo4j Certified Professional 2024

Languages

Turkish Native

English Advanced

German Intermediate (written), pre-intermediate (spoken)

Teaching & Community

TUM teaching assistant, Software Project Organization and Management (2019) · KU-GameDev founder at Koç University, 13-person core team (2014 – 2017) · Neo4j for IoT and GenAI session, Concept Reply (2026)

Interests

Writing a sci-fi fantasy novel · indie game development · chess and board games · space · football · cooking · travel
